Preface.

The aim of this work has been to bring together all the books and articles bearing on the history of the state of Illinois, as far as possible, and to so arrange and classify them as to make them of the greatest use to the student of the subject. This has been only partially accomplished, owing chiefly to the inaccessibility of much of the material, but it is felt that the list of works included will furnish at least a working basis for anyone desiring to pursue the study of this special part of the nation's history.

The time covered by the list extends from the year of the famous voyage of Marquette and Joliet, when the Illinois country is first known to have been traversed by the steps of white men, to the opening of the Civil war. The period divisions used are those into which the history seems most naturally to divide

-3061

UIUC

itself. Further divisions might have been made, but were not because of the difficulty in separating the material correspondingly.

The first period, that of the discovery and exploration of the country, from 1673 to 1700, is more fully covered than any of the others; yet, as the study of this epoch involves that of the early history of both Canada and Louisiana, the number of works to be consulted was very large and the treatment is not to any great degree exhaustive. It is regretted that the new edition of the "Jesuit Relations", which is now appearing under the editorship of Mr. R. G. Thwaites, has not as yet been brought down to a late enough date to be included, for, as it is to embrace many Relations not in the former edition, it will doubtless contain much of great value to our subject.

The next period, that of French colonization, and the subsequent ones, are, in a general way, it is hoped, satisfactorily treated. Many omissions were, however, unavoidable. The literature of the ordinance of 1787, which might be desired by the student of Illinois history, for instance, was so abundant and varied that it could barely be touched upon; that of the slavery movement in the state and of the constitutional history of the state were also but incidentally treated of. The histories of various cities and counties it was also found necessary to omit. The short list of references on the Chicago massacre is included, however, because the material was accessible and because it seemed to belong quite as well to the history of the state as to that

of Chicago proper.

As the object of the work was merely to bring together such material as was available on the subject for the use of students, not so much effort has been expended in collecting bibliographic details about the books included, as in obtaining the exact reference in every case, and in so analyzing and annotating them as to exactly indicate their contents.

As the work is to such a great degree analytical only the authors and brief titles of the books are given in the entries under the period divisions, the full titles and imprints being given in the "List of books referred to under the different periods with full titles and imprints" appended at the close. It is hoped that this will furnish as convenient a form of reference as is needed.
